EVERYTHING FREE, IN ONE PLACE

Tools, checklists, and downloads.

Every calculator, self-check, and printable on this site, grouped together — no sign-up for any of it, and nothing here is saved or sent anywhere unless a tool says otherwise. If you're looking for the lessons themselves, those live on the lesson library page instead.

Download this directory (PDF) All 24 items on this page, as one printable reference.

Learn & practice 7

Interactive ways to study and test what you know, beyond reading a lesson straight through.

REFERENCE

Glossary

Every key term used across the lesson library, searchable, with a flashcard study mode.

PRINTABLE

Glossary cram sheet

The whole glossary condensed to three printable pages for a quick pre-trading-day review.

QUIZ

Knowledge quiz

Quick questions on every track, pulled directly from the lessons, with your best score remembered per track.

SELF-CHECK

Trading style finder

A six-question self-assessment pointing you toward day, swing, or position trading based on your schedule and temperament.

TOOL

Broker finder

Filter the reviewed brokers by deposit, commission-free accounts, regulator strength and spreads. It narrows a list and does not rank or recommend.

EXERCISE

Spot the Red Flag

Click through a fictional broker DM and see instantly which lines are real red flags, and which just sound like them.

REFERENCE

FAQ

Short, direct answers to the questions that come up most before someone starts.

REFERENCE

Currency pair reference

What actually drives EUR/USD, GBP/USD, USD/JPY, and three other major pairs — not predictions, just the recurring factors.

Tools & calculators 2

Twenty-six calculators, simulators and a trade journal covering position sizing, margin, Kelly, drawdown recovery, swap and cost comparison, risk of ruin, and more — plus a way to turn any lesson into something shareable.

26 TOOLS

All calculators & simulators

Position size, margin, equity curve, risk-of-ruin Monte Carlo simulator, expectancy, broker cost comparison, and more — no sign-up.

GENERATOR

Quote card generator

Turn a lesson's key takeaway, or a documented trading-legend quote, into a square, Instagram-ready image.

Checklists & self-checks 2

Structured ways to work through a decision yourself, rather than take a claim at face value.

SCORED

Broker due-diligence checklist

A free 10-point checklist you can run against any broker you're considering, not just the ones Evenline lists.

ROUTINE

Daily trading checklist

A pre-session, in-session, and post-session routine turned into an actual checklist.

Free ebooks 6

Every track, compiled into a designed, printable ebook — one per track, each pulling directly from the lesson library.

8 CHAPTERS

The Foundations of Forex Trading

What forex is, order types, platforms, why most beginners lose money, leverage, position sizing, routine, and a written plan.

37 CHAPTERS

Market Literacy for Forex Traders

Fundamentals vs. technicals, economic data, interest rates, currency history, commodities, chart patterns, chart reading, brokers, and market mechanics.

9 CHAPTERS

Staying Steady

The discipline side of trading — journaling, realistic expectations, and staying level-headed through streaks either way.

29 CHAPTERS

Going Further

Account mechanics, leverage, risk of ruin, backtesting, trading styles, and country-specific rules and tax questions.

6 CHAPTERS

Red Flags & Warnings

Withdrawal red flags, prop-firm challenges, fake gurus, and decoding what broker marketing actually means.

19 CHAPTERS

Trading Legends

Ten documented trading careers — the wins, the well-reported failures, and what each one actually teaches.

Downloads & reference 6

Things meant to be printed, saved, or opened outside the browser.

PRINTABLE

Lesson track cheat sheets

A one-page, printable summary of every lesson in each track — pick a track, print it, or save as a PDF.

.PDF

Lesson track cheat sheets (PDF)

All six tracks as a designed, letterhead-style booklet — one page per track, with checkboxes, ready to print without opening the browser version.

READING LIST

Recommended trading books

A short, honest list of well-known trading books worth your time, and what each one is actually good for.

.XLSX

Trading journal (Excel)

A three-tab workbook — trade log, auto-calculating summary, and a read-me — with formulas for R-multiples, win rate, and followed-plan rate built in.

.PDF

Trading journal (printable)

A one-month printable booklet — cover, how-to-use, four weekly log + reflection spreads, and an end-of-month review.

`.CSV`

Trading journal (plain .csv)

Just the raw fields with two example rows — for anyone who'd rather import into their own spreadsheet or tool.

These tools are educational aids, not financial, tax, or legal advice. Several run entirely in your browser and save nothing — check each tool's own notes for specifics. Trading forex and CFDs involves significant risk of loss.
